3. Business

a) Discussion centered on getting more participation from program administrators within the Southeastern Section and possible session topics.

Included in the possible session topics are the following:

quality, assessment, ABET 2000 criteria and experiences,
ethics and professionalism, 120 credit restriction, distance education,
and industrial advisory committees.

To enhance participation from the administrators, there was discussion regarding the development of a listserv for all administrators within the Section. Recognizing that some administrators would rather not prepare a paper for the Proceedings, the thought about having more panel forums was discussed with positive feedback from those in attendance. It was felt that more individual attention to the administrators within the Section might promote more participation.
